

Royal Pacific Realtors Care Endowment Fund (\$35,000.00)

This Endowment is established by Royal Pacific Realty Corporation to support medical genetic research at BC Children Hospital. It is the Royal Pacific Realty' Corporate culture to give back to the community and improve better quality of life .I hope that this endowment will help to enable science to unlock many mysteries of childhood genetic illness and find ways to prevent, as well as to treat and cure, diseases and illnesses that affect children and their families.

Good health is the right for all the children. I support BC Children Hospital efforts to provide the best health care possible for children battling disease. Quality medical care builds a healthy society and children are the future leader of our community.
